

# November 2020 Capital Investment & Drilling Forecast Update

# Capital Investment & Drilling Forecast

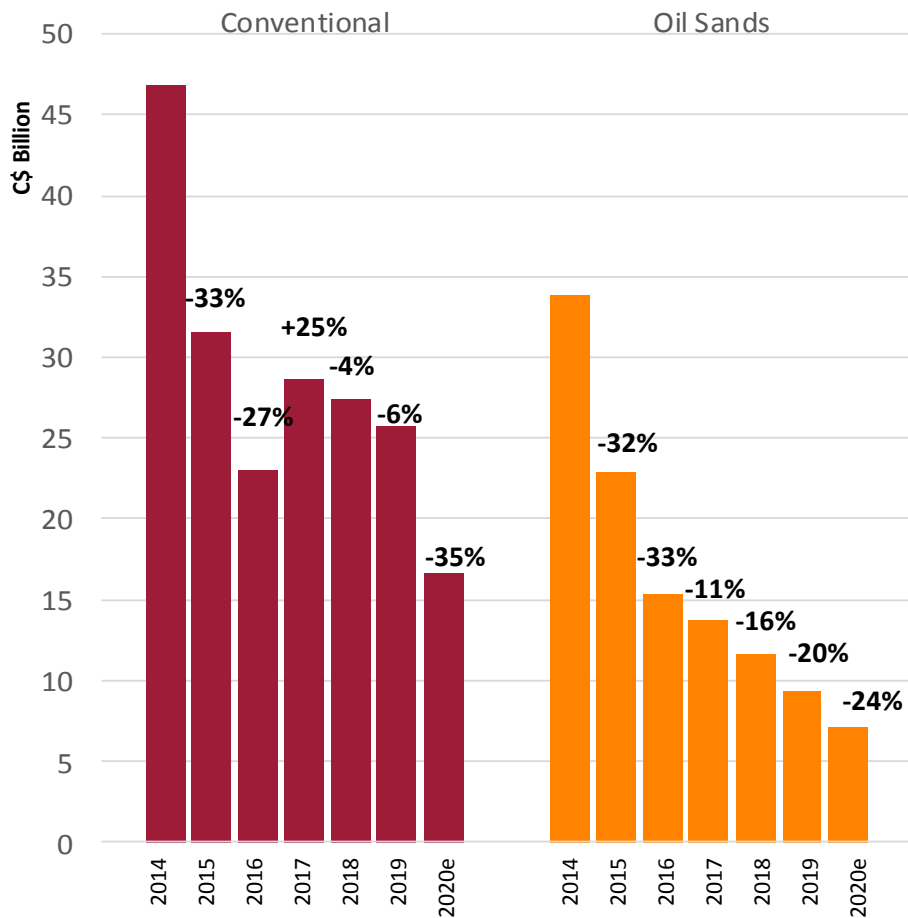

- Capital investment peaked at \$81 billion in 2014.
- In 2019 E&P capital spending was \$35 billion, an 10% decline from 2018. With Covid-19, 2020 is estimated to decline an unprecedented 32% to \$24 billion.
  - Conventional spending was \$26 billion in 2019 and estimated to be \$17 billion in 2020.
  - 2019 Oil sands fell 20% to \$9 billion from \$12 billion in 2018. 2020 estimate is down another 24% to \$7 billion. 2020 was initially forecast to grow 8% to \$12 billion which would have been the first growth in capital spending in last five years.
- In 2019 there were 4,250 wells drilled, down 30% from the 2018 actual of 6,115 wells (excludes service). The 2020 estimate is around 3,000 wells and the 2021 forecast is 3,300 wells.
- Payments to governments average about \$10 billion per year over a three year period ending in 2019.
- Upstream sector is second largest private sector investor in Canada in 2019.
