

ECONOMIST

The Canadian Association of Petroleum Producers (CAPP) is a non-partisan, research-based industry association that advocates on behalf of our member companies, large and small, that explore for, develop, and produce oil and natural gas throughout Canada. Our associate members provide a wide range of services that support the upstream industry.

CAPP's members produce nearly three quarters of Canada's annual oil and natural gas production and provide approximately 450,000 direct and indirect jobs in nearly all regions of Canada. According to the most recently published data, the industry contributes over \$70 billion to Canada's GDP, as well as \$45 billion in taxes and royalties to governments across the country. CAPP is a solution-oriented partner and works with all levels of government to ensure a thriving Canadian oil and natural gas industry.

We strive to meet the need for safe, reliable, affordable, and responsibly produced energy, for Canada and the world. We are proud to amplify industry efforts to reduce GHG emissions from oil and gas production and support Indigenous participation and prosperity.

Position Summary

This role will be a key member of CAPP's Research & Data department. The Economist will join a dynamic team of professionals that are responsible for the support and development of policy positions through quantitative analysis. As a member of the Research & Data team, this role will report to the Chief Economist.

- Responsible for detailed economic modelling of various energy scenarios and the presentation of findings to CAPP senior management, senior industry & government leaders.
- Model and analyze the impact of government policies, regulations, and geopolitical events at the macro and micro level.
- Provide strategic recommendations to senior management based on economic insights and market research.
- Conduct in-depth economic analysis of oil and gas markets, including supply and demand dynamics, pricing trends, and competitive landscape.
- Prepare detailed reports, presentations, and briefings on economic trends and market outlooks.
- Support cross-functional teams with economic insights and spatial intelligence.
- Maintain strong relationships and liaise with CAPP staff, CAPP member companies, governments, associations and public interest groups to identify and address emerging economic climate issues and priorities; to pursue desired policy changes and provide information on and enhance their understating of CAPP's activities and positions.
- Lead/support dialogue and consultation among member companies on various policy files, striving toward building consensuses.
- Keep apprised of and proactively address regulatory, environmental, economic and social policy issues related to the energy sector.
- Lead the development of economic policy submissions and assist in the formation of policy positions. Interface with government departments and agencies on policy-related issues.
- Stay updated with the latest developments in the global economy, energy markets, and industry-specific developments.
- Other duties as assigned.
